- C++
- HTML
- CSS
- SQL
- PHP
- Java Script

PROJECTS

SPACE SHOOTER GAME

This game was about galaxy that is attacked by enemies. The enemy invaders destroyed all of the galactica. There were different commands to protect the galaxy and surroundings.

Hand Following Robotic Car

The aim of this project was to design and build a hand following robot that uses Arduino, ultrasonic sensor, and IR sensors. A hand following robot is a robot that can detect and follow a flat object within a certain range.

Swift Route Finder

The Swift Route Finder is a C++ program that uses a graph to represent various locations within a specific area. This program is user defined, where the users can find the shortest path between two locations while it identifies the nearest hospital in case of an emergency

Power Grid Management System

Power Grid Management System is the database of CPPA company. The CPPA is a crucial intermediary between electricity generation companies and distribution companies (DISCOs), responsible for procuring and distributing electricity. We used HTML, CSS and PHP to design its frontend and SQL and JAVA script at its backend.

EDUCATION

Bahria University

Bachelor of Computer science
2022-2026
